OLIVIA LEBRON

Cybersecurity Analyst

770-866-0633 | Atlanta, GA | olivia.lebron01@gmail.com | linkedin.com/in/olivialebron | github.com/olivialebron

PROFESSIONAL SUMMARY

An emerging cybersecurity analyst with a background in technical recruiting within federal and enterprise technology environments. Completed hands-on training through the Per Scholas Cybersecurity Program, earning CompTIA Security+ and ISC² Certified in Cybersecurity. Demonstrates practical experience in threat detection, incident response, SIEM analysis, network traffic analysis, vulnerability assessment, Python scripting, and cloud security. Committed to supporting secure, resilient IT operations with strong analytical, communication, and problem-solving skills. Eager to contribute technical expertise and adaptability to a dynamic IT and infrastructure team.

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst Intern / Trainee — Dec '25 - Apr '26

Per Scholas — Atlanta, GA

Completed an intensive, hands-on cybersecurity training program focused on security operations, vulnerability management, and incident response in simulated enterprise environments.

- Performed incident detection, triage, and response using Splunk (SPL, correlation searches, alerting, SOAR), analyzing 100+ simulated alerts and reducing mean time to resolution (MTTR) by 25%.
- Conducted threat detection and investigation using Windows Event Logs and Sysmon, identifying suspicious activity, persistence mechanisms, and lateral movement aligned to MITRE ATT&CK.
- Performed network traffic analysis and troubleshooting using Wireshark and Tcpdump, applying TCP/IP, DNS, and OSI model knowledge to identify anomalies, C2 patterns, and connectivity issues.
- Gained hands-on experience supporting Windows, Linux, and macOS systems, troubleshooting endpoint, system performance, and log-related issues in simulated enterprise environments.
- Applied Active Directory (AD) and identity access management concepts, including user account administration and Group Policy configurations in lab environments.
- Practiced IT support and Office 365 troubleshooting, resolving user access, email, and application-related issues; utilized VPN and remote desktop tools (RDP/SSH) for secure system access.
- Conducted vulnerability assessments and security testing using Nmap, Metasploit, and Kali Linux; implemented security controls including ACLs, firewalls, and system hardening techniques.
- Applied encryption and security best practices, including hashing, salting, certificate management, and secure data handling aligned with foundational GRC frameworks (NIST, ISO 27001).
- Developed Python scripts and used SQL to automate log analysis, data processing, and reporting workflows, improving operational efficiency.
- Built and analyzed cloud and virtualized environments (GCP, Azure, containers), performed malware/phishing analysis, and produced incident reports, forensic findings, and root cause analyses to support continuous security improvement.

Senior Technical Recruiter | DOD Enterprise Solutions — Feb '24 - May '25

Information Technology Engineering LLC — Remote

- Served as a strategic partner to enterprise clients within an MSP delivery model across cybersecurity infrastructure and application support roles.
- Collaborated with stakeholders to design and execute technical delivery plans, achieving a 30% decrease in time to fill across 50+ requisitions.
- Advised Program Managers and Directors using ATS CRM and MSP platforms, increasing offer acceptance rates by 20%.
- Streamlined requisition workflows across ATS, LMS, and background screening platforms, improving stakeholder satisfaction by 15%.

Senior Recruiting Consultant | DOD Enterprise Solutions — Mar '22 - Feb '24

TekStream — Remote

- Partnered with an enterprise client under RPO model to deliver workforce solutions across cybersecurity, software engineering, and IT infrastructure programs.
- Consulted with hiring managers on workforce planning, increasing overall hiring volume by 30% across multiple business units.
- Managed contract-to-hire and direct hire delivery using Bullhorn, Workday, and Salesforce, improving placement quality and fulfillment consistency by 25%.
- Produced and analyzed delivery metrics including submit-to-interview ratios, time-to-fill, and onboarding data for executive-level reporting.

Strategic Talent Partner | DOD Enterprise Solutions — Feb '17 - Mar '22

TEKsystems — Remote

- Delivered workforce solutions across enterprise and federal accounts, aligning hiring execution with program delivery requirements and compliance obligations.
- Achieved 57.6% year-over-year start growth, including 84.2% short-term and 51.3% long-term placement increases; reached record weekly gross profit of $17,884.
- Collaborated with Delivery Managers and Account Executives to define talent strategies supporting program scalability and regulatory compliance.
- Supported onboarding and delivery operations using SAP SuccessFactors ATS and HR workflow tools.

EDUCATION

Bachelor of Science in Cybersecurity Jan '26

Strayer University Atlanta, GA

Golden Key International Honour Society

Associate of Arts in Information Technology Jan '17

Strayer University Atlanta, GA

Phi Theta Kappa Honor Society | Beta Upsilon Psi Chapter

Cybersecurity Analyst Program Dec '25 - Apr '26

Per Scholas Atlanta, GA

Hands-on training in SOC operations, incident response, threat detection, SIEM analysis, and endpoint security.

CERTIFICATIONS & TRAINING

CompTIA Security+ (SY0-701) Mar '26

ISC² Certified in Cybersecurity (CC) Mar '26

Splunk Core Certified Apr '26

PORTFOLIO & LAB PROFILES

- GitHub Portfolio: github.com/olivialebron | Projects include detection engineering, Python security automation, cloud security (GCP & Azure), and AI-driven threat analysis.
- TryHackMe: tryhackme.com/p/olivia.lebron
- Blue Team Labs Online (BTLO): blueteamlabs.online/home/user/87845099553f9456976684
- Verified Certifications: credly.com/users/olivialebron

CORE TECHNICAL SKILLS

- SIEM & Detection Engineering: Splunk (SPL, correlation, alerting, SOAR), Splunk Enterprise Security
- Network & Traffic Analysis: Wireshark, Tcpdump, TCP/IP, OSI Model, IDS/IPS
- Threat Analysis & Investigation: MITRE ATT&CK, CyberChef, VirusTotal, IOC analysis
- Security Testing & Enumeration: Nmap, Metasploit, Kali Linux
- Systems & Endpoint Visibility: Windows Event Logs, Sysmon, Linux CLI, log analysis
- Programming & Automation: Python (scripting, automation, data analysis), SQL (log querying, pipelines)
- Cloud Security: Google Cloud Platform (GCP), Microsoft Azure security fundamentals
- Security Operations: Vulnerability assessment, incident response lifecycle, risk management
